Profile

Backend .NET Developer | Software Engineer with experience in building scalable RESTful APIs using C#, ASP.NET Core, and SQL Server, along with full-stack exposure using Angular.Eager to contribute to meaningful projects while continuously developing technical expertise in a collaborative team.

Experience

Backend Developer Intern at AfqAlryiada (Remote) Mar 2025 – May 2025

- Managed dynamic content and customized data models using the headless CMS Directus.
- Configured content schemas and API endpoints to meet project requirements.

Fullstack Developer Intern at Athhan Nov 2025 – Jan 2026

- Contributed to frontend development tasks using HTML, CSS, and JavaScript.
- Assisted in maintaining and updating existing features in an ASP.NET WebForms application.
- Participated in maintaining parts of an ERP system and learned its basic workflows.

Education

Bachelor's Degree in Computer Science, Faculty of Science, Beni-Suef University **(2.8 GPA)** Aug 2019 – Jun 2023

Technical Skills

- C#
- Entity Framework Core
- Repository, UoW, Specification
- HTML
- JavaScript
- ASP.NET Core (Web API, MVC)
- Clean, Onion, N-tier Architectures
- Testing (Unit, Integration)
- CSS
- Angular
- MSSQL
- CQRS, MediatR
- Git, GitHub
- Bootstrap

Projects

Project Management SaaS (API) (Currently working on) GitHub Repo | Docs

- Built a Multi-tenant Project Management SaaS backend where each company gets its own private workspace, and one person can belong to several companies with their data kept fully separate and secure.
- Designed a secure sign-up and login experience with email verification, password recovery, and multi-device sessions, plus workspace controls such as Free/Pro plans, ownership transfer, and disabling or reactivating a workspace.
- Enabled team collaboration through email invitations to a company or directly to a project, with role-based permissions at both levels; **Tenant**: (Owner, Admin, Member), **Project**: (Manager, Member, Viewer) that control who can view or change what.
- Delivered project and task management: create projects, add team members, and assign tasks with priorities, due dates and status tracking, with safe delete and restore so no work is lost accidentally.
- **Currently building:** task comments, notifications, and team chat (channels and DMs).
- ***Tech Stack*:** C#, ASP.NET Core, Clean Architecture, CQRS & MediatR, EF Core, MSSQL, ASP.NET Identity,Redis, JWT, Serilog, FluentValidation, Background Services (Hangfire).

E-Learning Platform (API) GitHub Repo | Docs

- Built a modular RESTful API with ASP.NET Core, following Clean Architecture, with nested course > chapter > lesson management and ordering.
- Implemented cart and checkout flow with Paymob payment integration.

- Built enrollment and lesson-level progress tracking, plus quizzes with auto-graded attempts and scoring.
- Supported authentication (JWT with refresh tokens, Google OAuth 2.0) and role-based access control for students, instructors, and admins.
- Handled media uploads for course thumbnails, chapter images, and lesson videos via local storage and Cloudinary.
- ***Tech Stack*:** C#, ASP.NET Core, Clean Architecture, EF Core, MSSQL, ASP.NET Identity, JWT, Google OAuth 2.0, Paymob payment gateway, Cloudinary, Serilog, AutoMapper.

Talabat - E-Commerce (API) GitHub Repo **|** Docs

- Built a fully-featured e-commerce REST API using ASP.NET Core 10, following Clean Architecture and CQRS,
- Implemented JWT authentication with refresh tokens, email confirmation, and role-based access control using ASP.NET Identity.
- Implemented core modules: product catalog with multi-picture support, basket (Redis), orders, reviews, wishlists, and refund request management.
- Applied Specification Pattern, Unit of Work, and Repository Pattern for clean data access.
- Integrated with Fawaterak payment gateway.
- ***Tech Stack***: C#, ASP.NET Core 10, Clean Architecture, CQRS & MediatR, EF Core, MSSQL, Redis, ASP.NET Identity, JWT, Fawaterak payment gateway, Serilog, FluentValidation, AutoMapper.

Restaurants (API) GitHub Repo

- Designed a modular Web API using ASP.NET Core 8, integrating CQRS (MediatR).
- Applied layered architecture: Presentation, Application, Domain, and Infrastructure.
- Implemented unit/integration tests to ensure API reliability.
- ***Tech Stack*:** C#, ASP.NET Core 8, Clean Architecture, CQRS & MediatR, EF Core, MSSQL, ASP.NET Identity, JWT, Serilog, FluentValidation, AutoMapper, xUnit.

Courses

Full Stack Diploma, Route IT Training Center, Oct 2023 – Oct 2024
