Profile

Backend .NET Developer | Software Engineer with experience in building scalable RESTful APIs using C#, ASP.NET Core, and SQL Server. Eager to contribute to meaningful projects while continuously developing technical expertise in a collaborative team.

Experience

Backend Developer Intern at AfqAlryiada (Remote) Mar 2025 – May 2025

- Managed dynamic content and customized data models using the headless CMS Directus.
- Configured content schemas and API endpoints to meet project requirements.

Fullstack Developer Intern at Athhan Nov 2025 – Jan 2026

- Contributed to frontend development tasks using HTML, CSS, and JavaScript.
- Assisted in maintaining and updating existing features in an ASP.NET WebForms application.
- Participated in maintaining parts of an ERP system and learned its basic workflows.

Education

Bachelor's Degree of Computer Science, Faculty of Science, Beni-Suef University **(2.8 GPA)** Aug 2019 – Jun 2023

Technical Skills

- C#, OOP, LINQ
- Entity Framework Core
- Repository, Unit of Work
- HTML
- JavaScript
- ASP.NET Core (Web API, MVC)
- Clean, Onion, N-tier Architectures
- Specification Pattern
- CSS
- Angular
- Microsoft SQL Server
- CQRS, MediatR
- Testing (Unit, Integration)
- Bootstrap
- Git, GitHub

Projects

Inventory Management System (API) GitHub Repo

- Developed a RESTful API using ASP.NET Core 8 with Clean Architecture and CQRS (MediatR).
- Implemented inventory features: product/category management, transaction tracking, and low-stock alerts.
- Authentication, role-based access control, and automated workflows (registration, password resets emails, system alerts.)
- ***Tech Stack*:** C#, ASP.NET Core 8, Clean Architecture, CQRS & MediatR, Entity Framework Core, MS SQL, ASP.NET Identity, JWT, SMTP Email Services, Serilog, Fluent Validation, AutoMapper.

E-Learning Platform (API) GitHub Repo

- Built a modular RESTful API with ASP.NET Core 8, following Clean Architecture principles.
- Enabled course management, content uploads, progress tracking, and automated email notifications.
- Supported authentication (traditional login, Google OAuth 2.0) and role-based access control.
- ***Tech Stack*:** C#, ASP.NET Core 8, Clean Architecture, Entity Framework Core, MS SQL, ASP.NET Identity, JWT, Google OAuth 2.0, SMTP Email Services, Serilog, AutoMapper.

Restaurants (API) GitHub Repo

- Designed a modular Web API using ASP.NET Core 8, integrating CQRS (MediatR).
- Applied layered architecture: Presentation, Application, Domain, and Infrastructure.
- Implemented unit/integration tests to ensure API reliability.
- ***Tech Stack*:** C#, ASP.NET Core 8, Clean Architecture, CQRS & MediatR, Entity Framework Core, MS SQL, ASP.NET Identity, JWT, Serilog, Fluent Validation, AutoMapper, xUnit.

Shopping Cart (E-commerce MVC) GitHub Repo | Demo

- Developed an MVC app with ASP.NET Core 6 and a 3-tier architecture.

- Built Admin (management) and Customer (browsing, cart, and checkout) areas.
- ***Tech Stack***: C#, ASP.NET Core 6 MVC, 3-tier Architecture, Entity Framework Core, ASP.NET Core Identity, Stripe Gateway.

Courses

Full Stack Diploma, Route IT Training Center Oct 2023 – Oct 2024
